

HARSHVARDHAN GALANDE

+91-9075637322 | hrshvrdhn26@gmail.com | LinkedIn | GitHub

Summary

AI/ML engineer specializing in LLMs, RAG, and agentic systems, with hands-on experience building end-to-end AI products using Python, LangChain, and vector databases. Strong foundation in Data Structures, Algorithms, and frontend development. Skilled at turning research-grade AI techniques into deployable, scalable applications

Skills

- **Programming:** Python, JavaScript, SQL
- **Machine Learning:** Machine Learning, Deep Learning, NLP, Scikit-learn, Pandas, NumPy
- **Generative AI:** LLMs, Prompt Engineering, Embeddings, RAG, Fine-tuning
- **Web Development:** HTML, CSS, React.js, Tailwind CSS, API, GSAP.
- **Agentic AI & AI Engineering:** LangChain, LangGraph, Agentic AI / AI Agents, FastAPI, Qdrant, Pydantic
- **Databases:** Vector Databases (Qdrant and others), SQL-based Databases
- **Tools & Cloud:** Git, GitHub, Jupyter Notebook, VS Code, Docker, AWS/Cloud
- **Soft Skills:** Communication, Leadership, Team Collaboration, Problem-Solving

Experience

Research Intern

Jan 2025 – Feb 2025

Modern Education Society's Wadia College of Engineering, Pune

- Worked on **HEALTHAI**, a machine learning project for Alzheimer's Disease detection using MRI imaging data combined with structured clinical patient data.
- Performed data collection, cleaning, and feature engineering on clinical metrics (Age, Gender, MMSE, CDR) using **Python, Pandas, and NumPy**.
- Built and evaluated machine learning models using **Scikit-learn** to classify patients across CN, MCI, and AD categories, achieving 96%+ classification accuracy.
- Applied Grad-CAM-based explainability techniques to interpret model predictions and validate feature importance for clinical relevance.
- Performed model evaluation and result analysis to support clinical interpretability of findings.
- **Technologies:** Python, Pandas, NumPy, Scikit-learn, Machine Learning.

Projects

AI-Powered Job Application & Resume Intelligence Platform | Python, LLMs, RAG, Qdrant, FastAPI, Agentic AI

- Developed an AI-powered system to analyze resumes against job descriptions using LLMs, semantic embeddings, and Qdrant vector search.
- Built resume/JD parsing, semantic skill matching, and skill-gap detection using Python and FastAPI.
- Designed an agentic workflow that generates job-specific interview questions and preparation recommendations.

AI-Powered Customer Churn Prediction & Retention Assistant | Python, Machine Learning, LLMs, RAG, Qdrant, FastAPI

- Built an AI-powered system that combines machine learning-based churn prediction with LLM-driven explanations to identify customer risk and understand key churn factors.
- Implemented RAG and agentic workflows to generate evidence-based retention recommendations from relevant business policies and customer information.

NeuroBuddy – AI-Powered Learning Companion | Python, FastAPI, Firebase, Machine Learning, STT/TTS

- Developed an AI-powered learning companion for students with ADHD and Dyslexia, integrating machine learning, speech-to-text, text-to-speech, and personalized recommendations.
- Implemented and supported Collaborative Filtering, Content-Based Filtering, Reinforcement Learning, and RNN/LSTM/GRU-based modules for personalized learning and student progress monitoring.

Education

B.E. Computer Engineering

Modern Education Society's Wadia College of Engineering, Pune

2022 – 2026

SGPA: 7.84/10

Certifications & Activities

- Sheryians AI Powered Cohort of Web Development
- Generative AI & Agentic AI by ExcelR
- Prompt Engineering for Developers
